

# HOW **GREEN** IS MY COMMUNITY?

Hutchinson Utilities Commission is committed to using renewable and carbon-free resources, while still providing reliable and cost-effective electricity for our community. In 2025, 45% of the electricity we sell will be sourced from renewable resources like hydropower, wind and solar. Another 34% will originate from resources that are not renewable, but still produce carbon-free energy, such as nuclear energy.

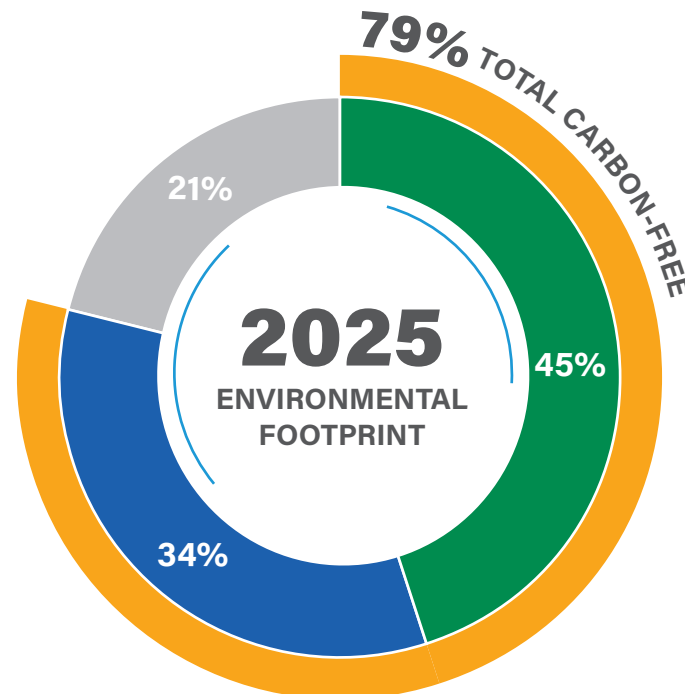

**That means 79% of the electricity you use in 2025 is carbon-free.**

As a public power community, we'll keep providing the power you can count on, and together, we'll shape a brighter tomorrow for future generations. That's the value of public power.

**HUTCHINSON UTILITIES COMMISSION**
